

Parklands Junior School

Calculation Policy 2019-2020

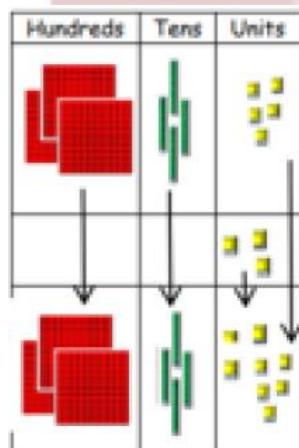

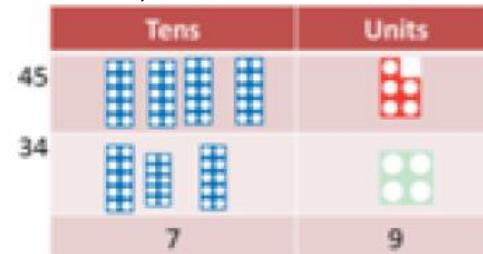

NC Objectives	Year 3: Mental addition
<p>Add and subtract numbers mentally, including: a three-digit number and 1s, a three digit number and 10s, a three digit number and 100s.</p>	<p>Using place value Count in 100s e.g. Know $475 + 200$ as $475, 575, 675$</p>  <p>Add multiples of 10, 100 and £1 e.g. $746 + 200$ e.g. $746 + 40$ e.g. $\text{£}6.34 + \text{£}5$ as $\text{£}6 + \text{£}5$ and $34p$</p> <p>Partitioning e.g. $\text{£}8.50 + \text{£}3.70$ as $\text{£}8 + \text{£}3$ and $50p + 70p$ and combine the totals: $\text{£}11 + \text{£}1.20$</p>  $36 + 53 = 53 + 30 + 6 \\ = 83 + 6 \\ = 89$  <p>Counting on Add two 2-digit numbers by adding the multiple of 10, then the 1s e.g. $67 + 55$ as $67 + 50 (117) + 5 = 122$ Add near multiples of 10 and 100 e.g. $67 + 39$ e.g. $364 + 199$ Add pairs of 'friendly' 3-digit numbers e.g. $548 + 120$ Count on from 3-digit numbers e.g. $247 + 34$ as $247 + 30 (277) + 4 = 281$</p> <p>Using number facts Know pairs which total each number to 20 e.g. $7 + 8 = 15$ e.g. $12 + 6 = 18$</p> <p>Number bonds to 100 e.g. $35 + 65$ e.g. $46 + 54$ e.g. $73 + 27$</p> <p>Add to the next 10 and the next 100 e.g. $176 + 4 =$</p>

		180 e.g. $435 + 65 = 500$
	Year 3: Written addition	
Add and subtract numbers with up to 3 digits, using formal written methods of columnar addition and subtraction. Solve problems, including missing number problems, using number facts, place value and more complex addition and subtraction	Expanded column addition <u>Misconception</u> Child does not understand what each number represents. $ \begin{array}{r} 237 + \\ 89 \\ \hline 1127 \end{array} $ <p>Children need to be secure on place value with two digit numbers before moving on to 3 digit numbers.</p> <p><u>Children need to be moving between concrete and pictorial methods before attempting the abstract</u></p>  <p>Children can draw a representation of the grid to further support their understanding, carrying the</p>	Standard column addition Abstract: $ \begin{array}{r} 38 \\ 93 \\ \hline 131 \end{array} $ <p>Once confident with using expanded addition, children can attempt to use standard method involving adding of single digits.</p>

ten underneath the line

Model using Dienes or numicon. Add together the ones first, then the tens.

Build on partitioning to develop expanded column addition with two 3-digit numbers

e.g. $466 + 358$

	$ \begin{array}{r} 400 \quad 60 \quad 6 \\ + 300 \quad 50 \quad 8 \\ \hline 700 \quad 110 \quad 14 = 824 \end{array} $ <p>Use expanded column addition where digits in a column add to more than the column value e.g. $466 + 358$</p> $ \begin{array}{r} 400 \quad 60 \quad 6 \\ 300 \quad 50 \quad 8 \\ + 100 \quad 10 \\ \hline 800 \quad 20 \quad 4 \end{array} $ <p>Compact column addition with 3- and 4-digit numbers Recognise like fractions that add to 1 e.g. $1/4 + 3/4$ e.g. $3/5 + 2/5$</p>	
--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

NC objectives	Year 3: Mental subtraction	
Add and subtract numbers mentally, including: a three-digit number and 1s, a three digit number and 10s,	<p>Taking away Use place value to subtract e.g. $348 - 300$ e.g. $348 - 40$  e.g. $348 - 8$</p>	<p>Counting up Find a difference between two numbers by counting up from the smaller to the larger e.g. $121 - 87$</p>

a three digit number and 100s.

Take away multiples of 10, 100 and £1

e.g. $476 - 40 = 436$

e.g. $476 - 300 = 176$

e.g. $\text{£}4.76 - \text{£}2 = \text{£}2.76$

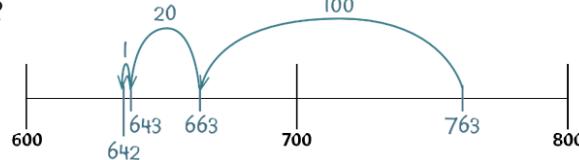

Partitioning

e.g. $68 - 42$ as $60 - 40$ and $8 - 2$

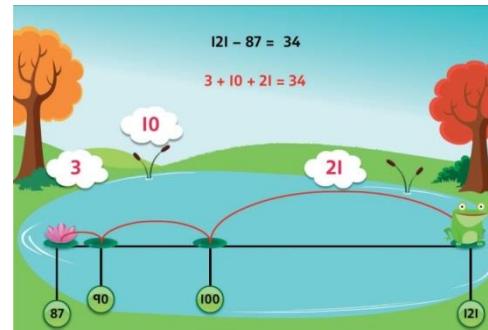

e.g. $\text{£}6.84 - \text{£}2.40$ as $\text{£}6 - \text{£}2$ and $80p - 40p$

Count back in 100s, 10s then 1s

e.g. $763 - 121$ as $763 - 100 (663) - 20 (643) - 1 = 642$

Subtract near multiples of 10 and 100 e.g. $648 - 199$
e.g. $86 - 39$

Using number facts

Know pairs which total each number to 20 e.g.

$20 - 14 = 6$

Number bonds to

100 e.g.

$100 - 48 =$

52

e.g. $100 - 35 = 65$

	Year 3: Written subtraction	
	<u>Children need to be secure on place</u>	

Add and subtract numbers with up to 3 digits, using formal written methods of columnar addition and subtraction. Solve problems, including missing number problems, using number facts, place value and more complex addition and

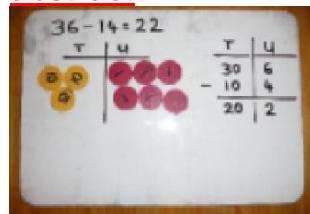

value with two digit numbers before moving on to 3 digit numbers.

Misconception

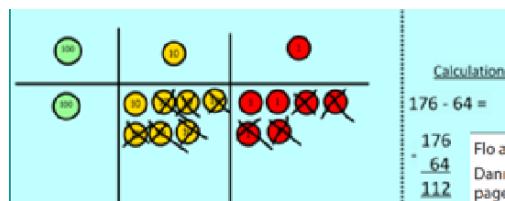

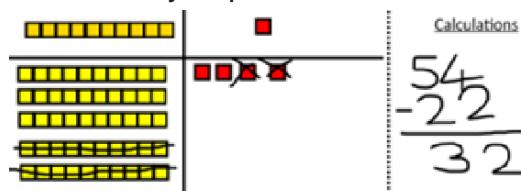

Child does not understand what each number represents.

$$\begin{array}{r}
 237 \\
 -89 \\
 \hline
 667
 \end{array}$$

Children need to be moving between concrete and pictorial methods before attempting the abstract

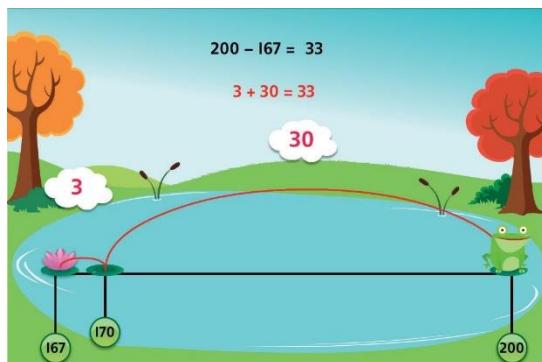

Show how you partition numbers to subtract.

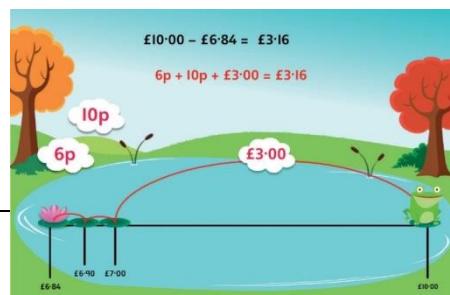

Draw the Base 10 or PV counters alongside the written calculation to help show working.

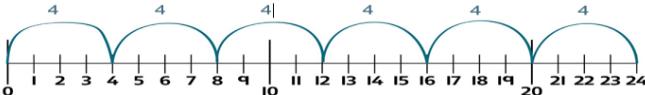

Use of a number line is important for partitioning and subtracting

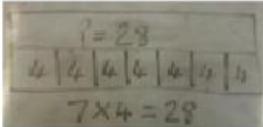

Develop counting up subtraction e.g. $200 - 167$

Use counting up subtraction to find change from £1, £5 and £10 e.g. $\text{£}10.00 - \text{£}6.84$

Year 3: Mental multiplication																																																																																																					
<p>Recall and use multiplication and division facts for 3,4, and 8 multiplication tables</p> <p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers using mental and progressing to formal written methods</p>	<p>Counting in steps ('clever' counting)</p> <p>Count in 2s, 3s, 4s, 5s, 8s and 10s</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td></tr> <tr><td>11</td><td>12</td><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18</td><td>19</td><td>20</td></tr> <tr><td>21</td><td>22</td><td>23</td><td>24</td><td>25</td><td>26</td><td>27</td><td>28</td><td>29</td><td>30</td></tr> <tr><td>31</td><td>32</td><td>33</td><td>34</td><td>35</td><td>36</td><td>37</td><td>38</td><td>39</td><td>40</td></tr> <tr><td>41</td><td>42</td><td>43</td><td>44</td><td>45</td><td>46</td><td>47</td><td>48</td><td>49</td><td>50</td></tr> <tr><td>51</td><td>52</td><td>53</td><td>54</td><td>55</td><td>56</td><td>57</td><td>58</td><td>59</td><td>60</td></tr> <tr><td>61</td><td>62</td><td>63</td><td>64</td><td>65</td><td>66</td><td>67</td><td>68</td><td>69</td><td>70</td></tr> <tr><td>71</td><td>72</td><td>73</td><td>74</td><td>75</td><td>76</td><td>77</td><td>78</td><td>79</td><td>80</td></tr> <tr><td>81</td><td>82</td><td>83</td><td>84</td><td>85</td><td>86</td><td>87</td><td>88</td><td>89</td><td>90</td></tr> <tr><td>91</td><td>92</td><td>93</td><td>94</td><td>95</td><td>96</td><td>97</td><td>98</td><td>99</td><td>100</td></tr> </table> <p>Using a number line</p>  <p>Grouping</p> <p>Recognise that multiplication is commutative e.g. $4 \times 8 = 8 \times 4$</p> <p>Multiply multiples of</p>	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60	61	62	63	64	65	66	67	68	69	70	71	72	73	74	75	76	77	78	79	80	81	82	83	84	85	86	87	88	89	90	91	92	93	94	95	96	97	98	99	100

	<p>10 by 1-digit numbers e.g. $30 \times 8 = 240$</p>	<p>Represent multiplication facts using Numicon and bead strings: $8 \times 3 = 24$</p>  <p>Represent using Diennes:</p>  <p>Bar Model:</p> 
--	------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Year 3: Written multiplication		
<p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit</p>	<p>Children need to be secure on the 2,3,4 5 and 8 times tables by the end of the year. Children with poor times table skills will find it difficult to apply this to bigger numbers.</p>	

<p>numbers times one-digit numbers using mental and progressing to formal written methods</p>	<p>Children need to visually see what happens when a number is multiplied before moving on to the columnar method.</p> <p>Grid multiplication</p> <p>Build on partitioning to develop grid multiplication</p> <p>e.g. 23×4</p> <table border="1" data-bbox="563 573 871 695"> <tr> <td>\times</td><td>20</td><td>3</td></tr> <tr> <td>4</td><td>80</td><td>12</td></tr> </table> <p>$= 92$</p> <p>Children need to show an understanding of multiplying with multiples of 10.</p> <p>e.g. $20 \times 4 = 80$</p> <p>$70 \times 4 = 280$</p> <p>$80 \times 5 = 400$</p>	\times	20	3	4	80	12	
\times	20	3						
4	80	12						

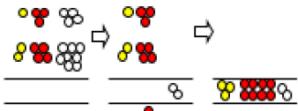

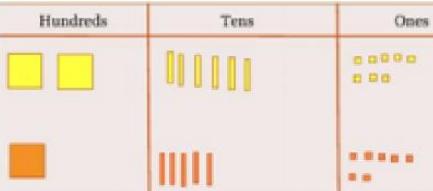

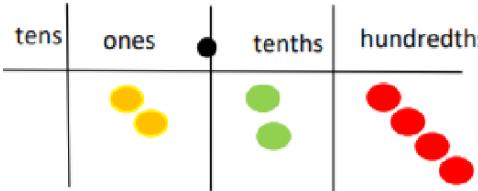

Year 3: Mental division	
<p>Recall and use multiplication and division facts for 3,4, and 8 multiplication tables</p> <p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers using mental and progressing to formal written methods</p>	<p>Counting in steps ('clever' counting)</p> <p>Count in 2s, 3s, 4s, 5s, 8s and 10s</p> <p></p> <p></p> <p>Children need to understand that division is based on repeated addition. They can identify patterns on numbers lines and hundred squares</p> <p>Doubling and halving</p> <p>Find half of even numbers to 100 using partitioning e.g. <i>find half of 48</i></p> <p></p> <p>Use halving as a strategy in dividing by 2 e.g. $36 \div 2$ is half of 36 = 18</p> <p>Find half of odd numbers</p> <p>Grouping</p> <p>Relate division to multiplications 'with holes in' e.g. $_ \times 5 = 30$ is the same calculation as $30 \div 5 = _$ thus we can count in 5s to find the answer</p> <p></p> <p>Divide multiples of 10 by 1-digit numbers e.g. $240 \div 8 = 30$</p>

Year 3: Written division	
<p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers using mental and progressing to formal written methods</p>	<p><u>Children need to be secure on the 2,3,4,5,8 times tables by the end of the year.</u> <u>Children with poor times tables skills will find it difficult to apply division.</u></p> <p>Perform divisions just above the 10th multiple using written jottings, understanding how to give a remainder as a whole number</p> <p>Use division facts to find unit and simple non-unit fractions of amounts within the times-tables e.g. $3/4$ of 48 is $3 \times (48 \div 4) = 36$</p> <p>Remainders $16 \div 3 = 5 \text{ r}1$ Sharing - 16 shared between 3, how many left over?</p>

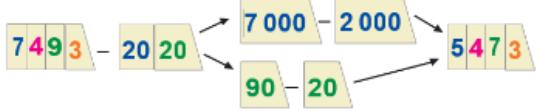

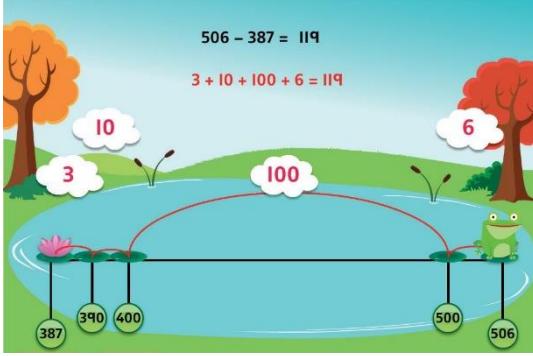

NC objectives		Year 4: Mental addition
Add and subtract	<p>Using place value Count in 1000s</p>	<p>Using number facts Number bonds to 100 and to the next</p>

<p>numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate.</p> <p>Estimate and use inverse operations to check answers to a calculation.</p>	<p>e.g. Know $3475 + 2000$ as $3475, 4475, 5475$</p> <p>Partitioning</p> <p>e.g. $746 + 40$</p> <p>e.g. $746 + 203$ as $700 + 200$ and 40 and $6 + 3$</p> <p>e.g. $134 + 707$ as $100 + 700$ and 30 and $4 + 7$</p> <p>Counting on</p> <p>Add 2-digit numbers to 2-, 3- and 4-digit numbers by adding the multiple of 10 then the 1s</p> <p>e.g. $167 + 55$ as $167 + 50$ (217) + $5 = 222$</p> <p>Add near multiples of 10, 100 and 1000</p> <p>e.g. $467 + 199$</p> <p>e.g. $3462 + 2999$</p> <p></p> <p>Count on to add 3-digit numbers and money</p> <p>e.g. $463 + 124$ as $463 + 100$ (563) + 20 (583) + $4 = 587$</p> <p>e.g. $\text{£}4.67 + \text{£}5.30$ as $\text{£}9.67 + 30p$</p>	<p>multiple of 100 e.g. $288 + 12 = 300$</p> <p>e.g. $1353 + 47 = 1400$</p> <p>e.g. $463 + 37 = 500$</p> <p></p> <p>Number bonds to £1 and to the next whole pound</p> <p>e.g. $63p + 37p = \text{£}1$</p> <p>e.g. $\text{£}3.45 + 55p = \text{£}4$</p> <p>Add to the next whole number e.g. $4.6 + 0.4$</p> <p>e.g. $7.2 + 0.8$</p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

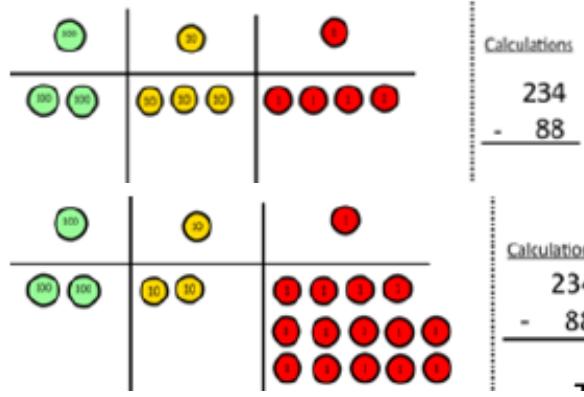

Year 4: Written addition		
Solve	Children will continue to apply their knowledge of place	Extend to decimals in the context of money (vertically)

<p>addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why</p>	<p>value to add larger numbers.</p> <p>Misconception</p> <p>Child does not understand what each number represents.</p> $ \begin{array}{r} 1237 + \\ 189 \\ \hline 2127 \end{array} $ <p>Children need to be moving between concrete and pictorial methods before attempting the abstract</p> <p></p> <p>Model using Dienes/PV counters to show the carrying into the next column.</p> <p></p> <p>Build on expanded column addition to develop compact column addition with larger numbers</p> <p>e.g. $1466 + 4868$</p> $ \begin{array}{r} 1000 \ 400 \ 60 \ 6 \\ 4000 \ 800 \ 60 \ 8 \\ + 1000 \ 100 \ 10 \\ \hline 6000 \ 300 \ 30 \ 4 \end{array} $	<p>Introduce decimal PV counters and model exchange for addition</p> <p></p> $ \begin{array}{r} \text{£ } 2.50 + \text{£ } 1.75 = \text{£ } 4.25 \\ \text{£ } 2.50 \\ + \text{£ } 1.75 \\ \hline \text{£ } 4.25 \end{array} $ <p>(Revert to expanded methods if the children experience any difficulty.)</p> <p>Add like fractions</p> <p>e.g. $\frac{3}{8} + \frac{1}{8} + \frac{1}{8}$</p>
----------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>Compact column addition with larger numbers e.g. $5347 + 2286 + 1495$</p> $ \begin{array}{r} 5347 \\ 2286 \\ + 1495 \\ \hline 9128 \end{array} $ <p>Partition into tens and ones and recombine Either partition both numbers and recombine or partition the second number only e.g. $55 + 37 = 55 + 30 + 7$ $= 85 + 7$ $= 92$</p>	
Year 4: Mental subtraction		
Add and subtract numbers with up to 4 digits using the formal written methods of	<p>Taking away Use place value to subtract e.g. $4748 - 4000$</p> <p>Take away multiples of 10, 100, 1000, £1, 10p or 0·1 e.g. $8392 - 50$ e.g. $6723 - 3000$ e.g. $\text{£}3\cdot74 - 30p$</p>	<p>Counting up Find a difference between two numbers by counting up from the smaller to the larger e.g. $506 - 387$ e.g. $4000 - 2693$</p>

<p>columnar addition and subtraction where appropriate.</p> <p>Estimate and use inverse operations to check answers to a calculation.</p>	<p>e.g. $5.6 - 0.2$</p> <p>Partitioning</p> <p>e.g. £5.87 – £3.04 as £5 – £3 and 7p – 4p</p> <p>e.g. $7493 - 2020$ as $7000 - 2000$ and $90 - 20$</p>  <p>Count back</p> <p>e.g. $6482 - 1301$ as $6482 - 1000$. $(5482) - 300 = 5182 - 1 = 5181$</p> <p>Subtract near multiples of 10, 100, 1000 or £1</p> <p>e.g. $3522 - 1999$ £34.86 - £19.99</p>	 <p>Using number facts</p> <p>Number bonds to £1 and £10 e.g. £1.00 – 86p = 14p</p> <p>e.g. £10.00 – £3.40 = £6.60</p>
---------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Year 4: Written subtraction		
<p>Solve addition and subtraction in two-step</p>	<p>Children will continue to apply their knowledge of place value to add larger numbers.</p>	

<p>problems in contexts, deciding which operation s and methods to use and why</p>	<p><u>Misconception</u></p> <p>Child does not understand what each number represents.</p> <p>1 2 3 7 - 1 8 9 0 6 6 7 _____</p> <p><small>Image result for maths wallpaper</small></p> <p>Children need to be moving between concrete and pictorial methods before attempting the abstract</p> <p>Start with one exchange before moving onto subtraction with two exchanges.</p> <p>A visual representation of base ten blocks for subtraction. It shows two sets of blocks. The first set shows 234 (2 hundreds, 3 tens, 4 ones) minus 88 (8 tens, 8 ones). The second set shows 234 minus 88, where one ten block has been exchanged for ten ones, resulting in 12 tens and 14 ones.</p> <p>Calculations</p> $ \begin{array}{r} 234 \\ - 88 \\ \hline \end{array} $ <p>Calculations</p> $ \begin{array}{r} 234 \\ - 88 \\ \hline \end{array} $ <p>Make the larger number with the place value counters. Start with the ones, can I take away 8 from 4 easily? I need to exchange one of tens for ten ones.</p>	<p>This visual representation will lead to an understanding of subtracting any number including decimals.</p> <p> $\begin{array}{r} 5 \ 12 \ 1 \\ 2 \cancel{6} \cancel{3} \ . \ 0 \\ - 2 \ 6 \ . \ 5 \\ \hline 2 \ 3 \ 6 \ . \ 5 \end{array}$ </p>
------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Draw counters onto a PV grid and show what you have taken away by crossing the counters out as well as clearly showing the exchanges you make.

Expanded column subtraction with 3- and 4-digit numbers e.g. 726 – 358

$$\begin{array}{r}
 600 \quad 110 \quad 16 \\
 \cancel{700} \quad \cancel{20} \quad \cancel{8} \\
 - \quad 300 \quad 50 \quad 8 \\
 \hline
 300 \quad 60 \quad 8
 \end{array}$$

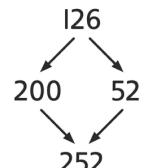

Begin to develop compact column subtraction e.g. 726 – 358

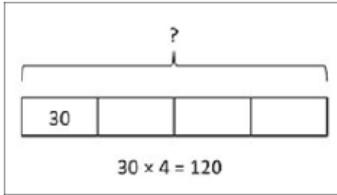

$$\begin{array}{r}
 6 \quad 11 \quad 16 \\
 \cancel{7} \quad \cancel{2} \quad \cancel{8} \\
 - \quad 3 \quad 5 \quad 8 \\
 \hline
 3 \quad 6 \quad 8
 \end{array}$$

Children will have a clear understanding of which each number

<p>represents and the idea behind ‘borrowing’ a number.</p> <p>Use counting up subtraction to find change from £10, £20, £50 and £100</p> <p>e.g. <i>Buy a computer game for £34.75 using £50</i></p>	 <p>Subtract like fractions</p> <p>e.g. $3/8 - 1/8 = 2/8$</p>	
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------	--

Year 4: Mental multiplication	
Recall multiplication and division facts for multiplication tables up to 12x12	Counting in steps (sequences) Count in 2s, 3s, 4s, 5s, 6s, 7s, 8s, 9s, 10s, 11s, 12s, 25s, 50s, 100s and 1000s  Doubling and halving Find doubles to double 100 and beyond using partitioning e.g. double 126 
Use place value, known and derived facts to multiply and divide mentally,	Multiply multiples of 100 and 1000 by 1-digit numbers using tables facts e.g. $400 \times 8 = 3200$ Multiply near multiples by rounding e.g. 24×19 as $(24 \times 20) - 24 = 456$ Using number facts Know times-tables up to 12×12

<p>including: multiplying by 0 and 1; dividing by 1; multiplying together 3 numbers.</p> <p>Recognise and use factor pairs and commutatively in mental calculations</p>	<p>Begin to double amounts of money e.g. £3.50 doubled is £7</p>  <p>Use doubling as a strategy in multiplying by 2, 4 and 8 e.g. 34×4 is double 34 (68) doubled again = 136</p> <p>Bar Model:</p> 	<table border="1" data-bbox="1170 271 1680 779"> <thead> <tr> <th>*</th> <th>1</th> <th>2</th> <th>3</th> <th>4</th> <th>6</th> <th>6</th> <th>7</th> <th>8</th> <th>9</th> <th>10</th> <th>11</th> <th>12</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>1</td> <td>2</td> <td>3</td> <td>4</td> <td>5</td> <td>6</td> <td>7</td> <td>8</td> <td>9</td> <td>10</td> <td>11</td> <td>12</td> </tr> <tr> <td>2</td> <td>2</td> <td>4</td> <td>6</td> <td>8</td> <td>10</td> <td>12</td> <td>14</td> <td>16</td> <td>18</td> <td>20</td> <td>21</td> <td>24</td> </tr> <tr> <td>3</td> <td>3</td> <td>6</td> <td>9</td> <td>12</td> <td>15</td> <td>18</td> <td>21</td> <td>24</td> <td>27</td> <td>30</td> <td>33</td> <td>36</td> </tr> <tr> <td>4</td> <td>4</td> <td>8</td> <td>12</td> <td>16</td> <td>20</td> <td>24</td> <td>28</td> <td>32</td> <td>36</td> <td>40</td> <td>44</td> <td>48</td> </tr> <tr> <td>5</td> <td>5</td> <td>10</td> <td>15</td> <td>20</td> <td>25</td> <td>30</td> <td>35</td> <td>40</td> <td>45</td> <td>50</td> <td>55</td> <td>60</td> </tr> <tr> <td>6</td> <td>6</td> <td>12</td> <td>18</td> <td>24</td> <td>30</td> <td>36</td> <td>42</td> <td>48</td> <td>54</td> <td>60</td> <td>66</td> <td>72</td> </tr> <tr> <td>7</td> <td>7</td> <td>14</td> <td>21</td> <td>28</td> <td>35</td> <td>42</td> <td>49</td> <td>56</td> <td>63</td> <td>70</td> <td>77</td> <td>84</td> </tr> <tr> <td>8</td> <td>8</td> <td>16</td> <td>24</td> <td>32</td> <td>40</td> <td>48</td> <td>56</td> <td>64</td> <td>72</td> <td>80</td> <td>88</td> <td>96</td> </tr> <tr> <td>9</td> <td>9</td> <td>18</td> <td>27</td> <td>36</td> <td>45</td> <td>54</td> <td>63</td> <td>72</td> <td>81</td> <td>90</td> <td>99</td> <td>108</td> </tr> <tr> <td>10</td> <td>10</td> <td>20</td> <td>30</td> <td>40</td> <td>50</td> <td>60</td> <td>70</td> <td>80</td> <td>90</td> <td>100</td> <td>110</td> <td>120</td> </tr> <tr> <td>11</td> <td>11</td> <td>22</td> <td>33</td> <td>44</td> <td>55</td> <td>66</td> <td>77</td> <td>88</td> <td>99</td> <td>110</td> <td>121</td> <td>132</td> </tr> <tr> <td>12</td> <td>12</td> <td>24</td> <td>36</td> <td>48</td> <td>60</td> <td>72</td> <td>84</td> <td>96</td> <td>108</td> <td>120</td> <td>132</td> <td>144</td> </tr> </tbody> </table>	*	1	2	3	4	6	6	7	8	9	10	11	12	1	1	2	3	4	5	6	7	8	9	10	11	12	2	2	4	6	8	10	12	14	16	18	20	21	24	3	3	6	9	12	15	18	21	24	27	30	33	36	4	4	8	12	16	20	24	28	32	36	40	44	48	5	5	10	15	20	25	30	35	40	45	50	55	60	6	6	12	18	24	30	36	42	48	54	60	66	72	7	7	14	21	28	35	42	49	56	63	70	77	84	8	8	16	24	32	40	48	56	64	72	80	88	96	9	9	18	27	36	45	54	63	72	81	90	99	108	10	10	20	30	40	50	60	70	80	90	100	110	120	11	11	22	33	44	55	66	77	88	99	110	121	132	12	12	24	36	48	60	72	84	96	108	120	132	144

	Year 4: Written multiplication	
Multiply two digit	Children will continue to apply their knowledge of place value to add larger numbers.	Use grid multiplication to multiply 2-digit numbers by 2-digit numbers

and three digit numbers by a one-digit number using formal written layout.

Grid method using PV counters:

Use grid multiplication to multiply 3-digit numbers by 1-digit numbers

e.g. 253×6

\times	200	50	3
6	1200	300	18

= 1518

Use a vertical written algorithm (ladder) to multiply 3-digit numbers by 1-digit numbers

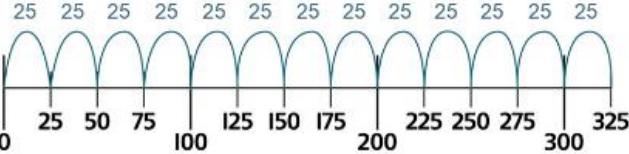

e.g. 253×6

$$\begin{array}{r}
 & 2 & 5 & 3 \\
 \times & & 6 & \\
 \hline
 & 1 & 2 & 0 & 0 & \leftarrow 6 \times 200 \\
 & & 3 & 0 & 0 & \leftarrow 6 \times 50 \\
 + & & & 1 & 8 & \leftarrow 6 \times 3 \\
 \hline
 & 1 & 5 & 1 & 8
 \end{array}$$

e.g. 16×48

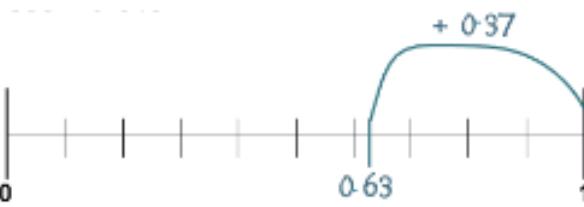

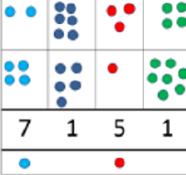

$$\begin{array}{r}
 \times & 10 & 6 \\
 \hline
 40 & 400 & 240 \\
 8 & 80 & 48 \\
 \hline
 & & 768
 \end{array}$$

Year 4: Mental division		
Recall multiplication	Counting in steps (sequences) Count in 2s, 3s, 4s, 5s, 6s, 7s, 8s, 9s, 10s, 11s,	Grouping Use multiples of 10 times the divisor to divide

<p>and division facts for multiplication tables up to 12x12</p> <p>Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together 3 numbers.</p> <p>Recognise and use factor pairs and commutatively in mental calculations</p>	<p>12s, 25s, 50s, 100s and 1000s</p>  <p>Divide multiples of 100 by 1-digit numbers using division facts e.g. $3200 \div 8 = 400$</p>	<p>by 1-digit numbers above the tables facts e.g. $45 \div 3$ as 10×3 (30) and 5×3 (15)</p> <p>Doubling and halving Find half of even numbers to 200 and beyond using partitioning e.g. <i>find half of 258</i></p> <pre> graph TD 258 --> 100 258 --> 29 100 --> 129 29 --> 129 </pre> <p>Begin to halve amounts of money e.g. £9 halved is £4.50</p> <p>Use halving as a strategy in dividing by 2, 4 and 8 e.g. $164 \div 4$ is half of 164 (82) halved again = 41</p>
Year 4: Written division		

<p>Multiply two digit and three digit numbers by a one-digit number using formal written layout.</p>	<p>Children will continue to apply their knowledge of place value to division. Teachers to encourage children to use a range of strategies to solve a problem.</p> <p>Remainders $41 \div 4 = 10 \text{ r}1$</p> <p>OR $41 = (10 \times 4) + 1$</p> <p><u>Pencil and paper procedures</u> $72 \div 5$ lies between $50 \div 5 = 10$ and $100 \div 5 = 20$</p> <ul style="list-style-type: none"> - $\frac{50}{22}$ (10 groups) or (10×5) - $\frac{20}{2}$ (4 groups) or (4×5) <p>Answer : 14 remainder 2</p> <p>Fractions Use division facts to find unit and non-unit</p>	<p>More confident children will be able to apply their understanding to the short division method.</p> <p>With PV counters:</p>
-------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------

	<p>fractions of amounts within the times-tables e.g. $7/8$ of 56 is $7 \times (56 \div 8) = 48$</p>																																																																																																													
NC objectives	<p>Year 5: Mental addition</p>																																																																																																													
<p>Add and subtract numbers mentally with increasingly large numbers</p> <p>Use rounding to check answers to calculations and determine, in the context of the problem, levels of accuracy</p> <p>Solve addition and subtraction multi-step problems in contexts deciding which operations and methods to use and why</p>	<p>Using place value Count in 0·1s, 0·01s e.g. <i>Know what 0·1 more than 0·51 is</i></p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center; color: green;">10s</td> <td style="text-align: center; color: orange;">1s</td> <td style="text-align: center; color: lightblue;">0·1s</td> <td style="text-align: center; color: lightcoral;">0·01s</td> </tr> <tr> <td></td> <td style="text-align: center; color: orange;">0</td> <td style="text-align: center; color: lightblue;">5</td> <td style="text-align: center; color: lightcoral;">1</td> </tr> </table> <p>Partitioning e.g. $2\cdot4 + 5\cdot8$ as $2 + 5$ and $0\cdot4 + 0\cdot8$ and combine the totals: $7 + 1\cdot2 = 8\cdot2$</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td>0·1</td><td>0·2</td><td>0·3</td><td>0·4</td><td>0·5</td><td>0·6</td><td>0·7</td><td>0·8</td><td>0·9</td><td>1</td></tr> <tr> <td>1·1</td><td>1·2</td><td>1·3</td><td>1·4</td><td>1·5</td><td>1·6</td><td>1·7</td><td>1·8</td><td>1·9</td><td>2</td></tr> <tr> <td>2·1</td><td>2·2</td><td>2·3</td><td>2·4</td><td>2·5</td><td>2·6</td><td>2·7</td><td>2·8</td><td>2·9</td><td>3</td></tr> <tr> <td>3·1</td><td>3·2</td><td>3·3</td><td>3·4</td><td>3·5</td><td>3·6</td><td>3·7</td><td>3·8</td><td>3·9</td><td>4</td></tr> <tr> <td>4·1</td><td>4·2</td><td>4·3</td><td>4·4</td><td>4·5</td><td>4·6</td><td>4·7</td><td>4·8</td><td>4·9</td><td>5</td></tr> <tr> <td>5·1</td><td>5·2</td><td>5·3</td><td>5·4</td><td>5·5</td><td>5·6</td><td>5·7</td><td>5·8</td><td>5·9</td><td>6</td></tr> <tr> <td>6·1</td><td>6·2</td><td>6·3</td><td>6·4</td><td>6·5</td><td>6·6</td><td>6·7</td><td>6·8</td><td>6·9</td><td>7</td></tr> <tr> <td>7·1</td><td>7·2</td><td>7·3</td><td>7·4</td><td>7·5</td><td>7·6</td><td>7·7</td><td>7·8</td><td>7·9</td><td>8</td></tr> <tr> <td>8·1</td><td>8·2</td><td>8·3</td><td>8·4</td><td>8·5</td><td>8·6</td><td>8·7</td><td>8·8</td><td>8·9</td><td>9</td></tr> <tr> <td>9·1</td><td>9·2</td><td>9·3</td><td>9·4</td><td>9·5</td><td>9·6</td><td>9·7</td><td>9·8</td><td>9·9</td><td>10</td></tr> </table>	10s	1s	0·1s	0·01s		0	5	1	0·1	0·2	0·3	0·4	0·5	0·6	0·7	0·8	0·9	1	1·1	1·2	1·3	1·4	1·5	1·6	1·7	1·8	1·9	2	2·1	2·2	2·3	2·4	2·5	2·6	2·7	2·8	2·9	3	3·1	3·2	3·3	3·4	3·5	3·6	3·7	3·8	3·9	4	4·1	4·2	4·3	4·4	4·5	4·6	4·7	4·8	4·9	5	5·1	5·2	5·3	5·4	5·5	5·6	5·7	5·8	5·9	6	6·1	6·2	6·3	6·4	6·5	6·6	6·7	6·8	6·9	7	7·1	7·2	7·3	7·4	7·5	7·6	7·7	7·8	7·9	8	8·1	8·2	8·3	8·4	8·5	8·6	8·7	8·8	8·9	9	9·1	9·2	9·3	9·4	9·5	9·6	9·7	9·8	9·9	10	<p>Counting on Add two decimal numbers by adding the 1s, then the 0·1s/0·01s e.g. $5\cdot72 + 3\cdot05$ as $5\cdot72 + 3$ ($8\cdot72$) + $0\cdot05 = 8\cdot77$ Add near multiples of 1 e.g. $6\cdot34 + 0\cdot99$ e.g. $5\cdot63 + 0\cdot9$ Count on from large numbers e.g. $6834 + 3005$ as $9834 + 5$</p> <p>Using number facts Number bonds to 1 and to the next whole number e.g. $5\cdot7 + 0\cdot3$ e.g. $0\cdot4 + 0\cdot6$</p>
10s	1s	0·1s	0·01s																																																																																																											
	0	5	1																																																																																																											
0·1	0·2	0·3	0·4	0·5	0·6	0·7	0·8	0·9	1

9·1	9·2	9·3	9·4	9·5	9·6	9·7	9·8	9·9	10																																																																																																					

		 <p>Add to the next 10 from a decimal number e.g. $7.8 + 2.2 = 10$</p>
	<p>Year 5: Written addition</p> <p>Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)</p> <p>Children can draw a pictorial representation of the columns and place value counters to further support their learning and understanding.</p>  <p>Money:</p>	<p>Children to continue using appropriate resources to support their reasoning skills. Emphasis to be put on to the reasoning.</p> <p>Add related fractions e.g. $\frac{3}{4} + \frac{1}{8} = \frac{7}{8}$</p> <p>$\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$</p>  <p>Add or subtract the nearest multiple of 10 or 100, then adjust Continue as in Year 2, 3 and 4 but with appropriate numbers e.g. $458 + 79$ = is the same as $458 + 80 - 1$</p>

$$\begin{array}{r}
 \text{Sam} \quad \boxed{} \quad + \text{£}6\text{.}20 \\
 \text{Tom} \quad \boxed{}
 \end{array}
 \left. \begin{array}{r}
 \text{£}6\text{7}\text{.}80 \\
 \text{£}6\text{7}\text{.}80 - \text{£}6\text{.}20 = \text{£}61\text{.}60 \\
 \text{£}61\text{.}60 \div 2 = \text{£}30\text{.}80 \\
 \text{Tom has £}30\text{.}80
 \end{array} \right\} \text{£}67\text{.}80$$

$$\text{£}67\text{.}80 - \text{£}6\text{.}20 = \text{£}61\text{.}60$$

$$\text{£}61\text{.}60 \div 2 = \text{£}30\text{.}80$$

$$\text{Tom has £}30\text{.}80$$

Bar Models

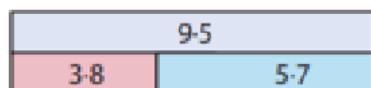

Expanded column addition for money leading to compact column addition for adding several amounts of money

$$\text{e.g. £}14\text{.}64 + \text{£}28\text{.}78 + \text{£}12\text{.}26$$

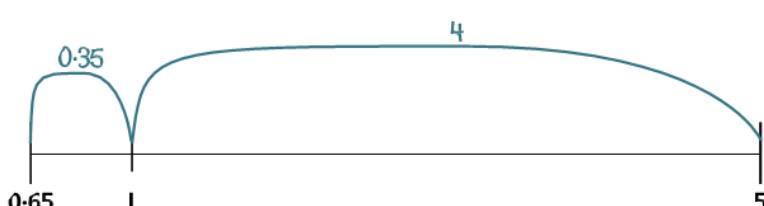

$$\begin{array}{r}
 \text{£}14 \quad 60\text{p} \quad 4\text{p} \\
 \text{£}28 \quad 70\text{p} \quad 8\text{p} \\
 + \text{£}12 \quad 20\text{p} \quad 6\text{p} \\
 \hline
 \text{£}1 \quad 10\text{p} \\
 \hline
 \text{£}55 \quad 60\text{p} \quad 8\text{p}
 \end{array}$$

Compact column addition to add pairs of 5-digit numbers Continue to use column addition to add towers of several larger numbers

Bar Models for adding decimals:

Use compact addition to add decimal numbers with up to 2 decimal places

	<p>e.g. $15.68 + 27.86$</p> $ \begin{array}{r} 15.68 \\ + 27.86 \\ \hline 43.54 \end{array} $ <p>Revert to expanded methods if the children experience any difficulty.</p>	
Year 5: Mental subtraction		
<p>Add and subtract numbers mentally with increasingly large numbers</p> <p>Use rounding to check answers to calculations and determine, in the context of the problem, levels of accuracy</p> <p>Solve addition and subtraction</p>	<p>Taking away</p> <p>Use place value to subtract decimals</p> <p>e.g. $4.58 - 0.08$</p> <p>e.g. $6.26 - 0.2$</p> <p>Take away</p> <p>multiples of powers of 10</p> <p>e.g. $15.672 - 300$</p> <p>e.g. $4.82 - 2$ e.g. $2.71 - 0.5$</p> <p>e.g. $4.68 - 0.02$</p> <p>Partitioning or counting back</p> <p>e.g. $3964 - 1051$</p>	<p>Using number facts</p> <p>Derived facts from number bonds to 10 and 100</p> <p>e.g. $2 - 0.45$ using $45 + 55 = 100$</p> <p>e.g. $3 - 0.86$ using $86 + 14 = 100$</p>  <p>Number bonds to £1, £10 and £100 e.g. £4.00 - £3.86</p>

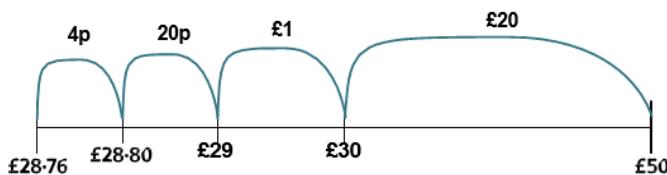

multi-step problems in contexts deciding which operations and methods to use and why	<p>e.g. $5.72 - 2.01$ Subtract near multiples of 1, 10, 100, 1000, 10 000 or £1 e.g. $86\ 456 - 9999$ e.g. $3.58 - 1.99$</p> <p>Counting up Find a difference between two numbers (or money) by counting up from the smaller to the larger e.g. $\text{£}12.05 - \text{£}9.59$ e.g. $2009 - 869$</p>	<p>e.g. $\text{£}100 - \text{£}66$ using $66 + 34 = 100$</p>
Year 5: Written subtraction		
Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)	<p><u>Children to continue using appropriate resources to support their reasoning skills.</u> <u>Emphasis to be put on to the reasoning.</u></p> <p><u>Children can draw a pictorial representation of the columns and use PV counters to further support their learning and understanding.</u></p> <p>(as year 4)</p>	

Compact column subtraction for numbers with up to 5 digits e.g. $16\ 324 - 8516$

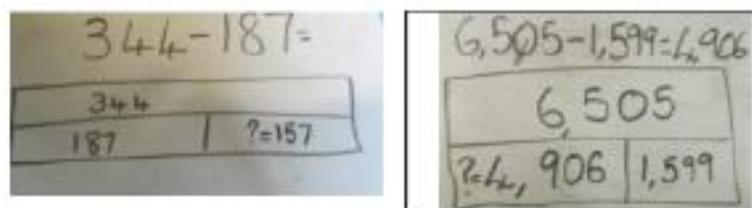

$$\begin{array}{r}
 0 \ 15 \ 13 \ 1 \ 14 \\
 \cancel{X} \ \cancel{8} \ \cancel{2} \ \cancel{Z} \ \cancel{4} \\
 - 8 \ 5 \ 1 \ 6 \\
 \hline
 7 \ 8 \ 0 \ 8
 \end{array}$$

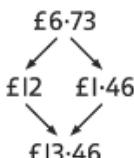

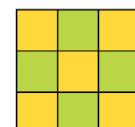

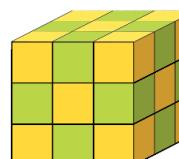

Continue to use counting up subtraction for subtractions involving money, including finding change

e.g. £50 - £28.76

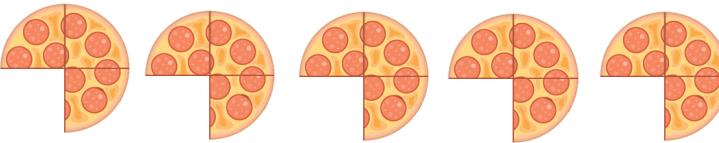

Use of a bar model in order to represent a 'part' during a missing no. subtraction problem. This can be linked to decimals.

	<p>Subtract related fractions e.g. $\frac{3}{4} - \frac{1}{8} = \frac{5}{8}$</p> <p>NB Counting up subtraction provides a default method for ALL children</p>	
	<p>Year 5: Mental multiplication</p>	
<p>Identify multiples and factors including finding all factor pairs of a number and common factors of 2 numbers</p> <p>Know and use vocabulary of prime numbers, prime factors and composite (non-prime) numbers</p> <p>Establish whether a number up to 100 is prime and recall prime</p>	<p>Doubling and halving Double amounts of money using partitioning e.g. double £6.73</p>  <p>Use doubling and halving as a strategy in multiplying by 2, 4, 8, 5 and 20 e.g. 58×5 is half of 58×10 ($580 = 290$)</p> <p>Grouping Multiply whole numbers and decimals by 10, 100, 1000 e.g. $3.4 \times 100 = 340$</p> <p>Use partitioning to multiply 'friendly' 2- and 3-digit numbers by 1-digit numbers e.g. 402×6 as 400×6 (2400) and 2×6 (12) = 2412</p> <p>Use partitioning to multiply decimal numbers by 1-digit numbers e.g. 4.5×3 as 4×3 (12) and 0.5×3 (1.5) = 13.5</p>	<p>Using number facts Use times-tables facts up to 12×12 to multiply multiples of 10/100 of the multiplier e.g. $4 \times 6 = 24$ so $40 \times 6 = 240$ and $400 \times 6 = 2400$</p> <p>Use knowledge of factors and multiples in multiplication e.g. 43×6 is double 43×3 e.g. 28×50 is half of 28×100 ($2800 = 1400$)</p> <p>Know square numbers and cube numbers</p>  

<p>numbers up to 19</p> <p>Multiply and divide numbers mentally, drawing upon known facts</p> <p>Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000</p> <p>Recognise and use square numbers and cube numbers and the notation for squared and cubed</p> <p>Solve problems involving multiplication and division, including using their knowledge of factors and multiples,</p>	<p>Multiply near multiples by rounding e.g. 32×29 as $(32 \times 30) - 32 = 928$</p>	
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------	--

squares and cubes Solve problems involving addition subtraction multiplication and division and a combination of these, including understanding the meaning of the equals sign		
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

	Year 5: Written multiplication	
Multiply numbers up to 4 digits by a one or two-digit number using a formal written method, including long multiplication	Short multiplication of 2-, 3- and 4-digit numbers by 1-digit numbers e.g. 435×8 $ \begin{array}{r} 4 \ 3 \ 5 \\ \times \ \ \ \ 8 \\ \hline 3 \ 4 \ 8 \ 0 \end{array} $ Long multiplication of 2-, 3-and 4-digit numbers by 'teen' numbers e.g. 48×16	Multiply fractions by 1-digit numbers e.g. $\frac{3}{4} \times 6 = \frac{18}{4} = 4 \frac{2}{4} = 4 \frac{1}{2}$  NB Grid multiplication provides a default method for ALL children

<p>for two-digit numbers</p> <p>Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates</p>	$ \begin{array}{r} 4 \textcolor{teal}{8} \\ \times \textcolor{teal}{1} \textcolor{teal}{6} \\ \hline 4 \textcolor{violet}{8} \textcolor{violet}{0} \\ 2 \textcolor{violet}{8} \textcolor{teal}{4} \textcolor{teal}{8} \\ \hline 7 \textcolor{violet}{6} \textcolor{violet}{8} \end{array} $ <p>Grid multiplication of numbers with up to 2 decimal places by 1-digit numbers e.g. 1.34×6</p> <table border="1" data-bbox="444 727 842 843"> <tr> <td>\times</td><td>$\textcolor{teal}{1}$</td><td>0.3</td><td>0.04</td></tr> <tr> <td>6</td><td>6</td><td>1.8</td><td>0.24</td></tr> </table> <p>$= 8.04$</p>	\times	$\textcolor{teal}{1}$	0.3	0.04	6	6	1.8	0.24	<p>Extend to simple decimals with one decimal place.</p> $ \begin{array}{r} 12.5 \\ \times 2 \\ \hline 1.0 \quad (2.0 \times 0.5) \\ 4.0 \quad (2.0 \times 2.0) \\ \underline{20.0} \quad (2.0 \times 10.0) \\ 25.0 \end{array} $
\times	$\textcolor{teal}{1}$	0.3	0.04							
6	6	1.8	0.24							

Year 5: Mental division		
<p>Identify multiples and factors including finding all factor pairs of a number and common factors of 2 numbers</p>	<p>Doubling and halving Halve amounts of money using partitioning e.g. half of £14.84 is half of £14 (£7) plus half of 84p (42p)</p> 	<p>Using number facts Use division facts from the times-tables up to 12×12 to divide multiples of powers of 10 of the divisor e.g. $3600 \div 9$ using $36 \div 9$</p> <p>Know square numbers and cube numbers</p>

<p>Know and use vocabulary of prime numbers, prime factors and composite (non-prime) numbers</p> <p>Establish whether a number up to 100 is prime and recall prime numbers up to 19</p> <p>Multiply and divide numbers mentally, drawing upon known facts</p> <p>Multiply and divide whole numbers and those involving decimals by</p>	<p>Use doubling and halving as a strategy in dividing by 2, 4, 8, 5 and 20 e.g. $115 \div 5$ as double 115 ($230 \div 10 = 23$)</p> <p>Divide numbers by 10, 100, 1000 to obtain decimal answers with up to 3 decimal places e.g. $340 \div 100 = 3.4$</p> <div style="background-color: #e0e0e0; padding: 10px; border: 1px solid #ccc; width: fit-content; margin-left: auto; margin-right: auto;"> $7 \div 10 = 0.7$ $7 \div 100 = 0.07$ $\begin{array}{r} 0.07 \\ \times \frac{10}{100} \\ \hline 7 \\ 0.7 \quad (\div 10) \\ 0.07 \quad (\div 100) \end{array}$ </div> <p>Use the 10th, 20th, 30th ... multiple of the divisor to divide 'friendly' 2- and 3-digit numbers by 1-digit numbers e.g. $186 \div 6$ as 30×6 (180) and 1×6 (6)</p> <div style="border: 1px solid #ccc; padding: 10px; width: fit-content; margin-left: auto; margin-right: auto;"> $186 \div 6 = \boxed{}$ $\begin{array}{r} \boxed{} \times 6 = 186 \\ 30 \times 6 = 180 \\ \hline 6 \\ 1 \times 6 = 6 \\ \hline 0 \\ 31 \end{array}$ </div>	
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

<p>10, 100 and 1000</p> <p>Recognise and use square numbers and cube numbers and the notation for squared and cubed</p> <p>Solve problems involving multiplication and division, including using their knowledge of factors and multiples, squares and cubes</p> <p>Solve problems involving addition subtraction multiplication</p>		
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

<p>and division and a combination of these, including understanding the meaning of the equals sign</p>		
<p>Year 5: Written division</p> <p>Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context</p> <p>Solve problems involving multiplication and division,</p>	<p><u>Children to continue to use appropriate resources to support understanding of division</u></p> <p>Short division using PV counters</p> <div data-bbox="541 727 961 933"> </div> <div data-bbox="512 949 983 992"> <p>Create the dividend using Place Value counters.</p> </div> <div data-bbox="541 1013 961 1219"> </div> <div data-bbox="489 1235 1010 1324"> <p>Group the 1000s counters according to the divisor and write the number of groups above the line in the thousands column.</p> </div>	

including scaling by simple fractions and problems involving simple rates

$$9635 \div 3 =$$

32

$3 \overline{)9635}$

Group the 100s counters according to the divisor and write the number of groups above the line in the hundreds column.

Short division of 3- and 4-digit numbers by 1-digit numbers

e.g. $139 \div 3$

$$\begin{array}{r} 4 \ 6 \ r \ 1 \\ 3 \overline{)1 \ 3 \ 1 \ 9} \end{array}$$

Give remainders as whole numbers or as fractions Find unit and non-unit fractions of large amounts e.g. $3/5$
of 265 is $3 \times (265 \div 5) = 159$

Long division

$$353 \div 15 = 23 r 8$$

$15 \overline{)3 \ 5 \ 3}$

*divisor
x15 Table*

Turn improper fractions into mixed numbers and vice versa

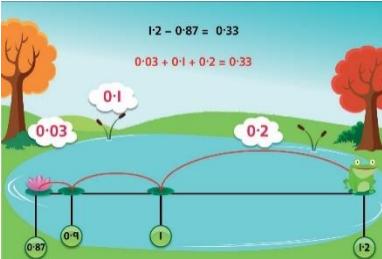

NC objectives	Year 6: Mental addition	
<p>Perform mental calculations with mixed operations to carry out calculations involving the four operations</p> <p>Solve multi-step problems in contexts, deciding which operations and methods to use and why</p> <p>Solve problems involving addition and</p>	<p>Using place value Count in 0.1s, 0.01s, 0.001s e.g. <i>Know what 0.001 more than 6.725 is</i></p> <p>Partitioning e.g. <i>9.54 + 3.23 as 9 + 3, 0.5 + 0.2 and 0.04 + 0.03, to give 12.77</i></p> <p>Counting on Add two decimal numbers by adding the 1s, then the 0.1s/0.01s/0.001s e.g. <i>6.314 + 3.006 as 6.314 + 3 (9.314) + 0.006 = 9.32</i></p> <p>Add near multiple s of 1 e.g. 6.345 + 0.999 e.g. $5.673 + 0.9$</p>	<p>Using number facts Number bonds to 1 and to the next multiple of 1 e.g. $0.63 + 0.37$ e.g. $2.355 + 0.645$</p>  <p>Add to the next 10 e.g. $4.62 + 5.38$</p>

subtraction Use estimation to check calculations and determine, in the context of the problem, an appropriate degree of accuracy.	Count on from large numbers e.g. $16\ 375 + 12\ 003$ as $28\ 375 + 3$	
--------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------	--

Year 6: Written addition	<p>Children use their previous learning of addition to solve more complex addition, subtraction, multiplication and division problems. Children can use the resources to either physically or pictorially explain their mathematical thinking.</p> <p>Compact column addition for adding several large numbers and decimal numbers with up to 2 decimal places</p> <p>Compact column addition with money e.g. $\pounds 14.64 + \pounds 28.78 + \pounds 12.26$</p>	<p>Partition into hundreds, tens, ones and decimal fractions and recombine</p> <p>Either partition both numbers and recombine or partition the second number only e.g.</p> $ \begin{aligned} 35.8 + 7.3 &= 35.8 + 7 + 0.3 \\ &= 42.8 + 0.3 \\ &= 43.1 \end{aligned} $ 
--------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	$ \begin{array}{r} \text{£} \textcolor{teal}{1} \textcolor{brown}{4} \cdot \textcolor{brown}{6} \textcolor{teal}{4} \\ + \text{£} \textcolor{teal}{2} \textcolor{brown}{8} \cdot \textcolor{brown}{7} \textcolor{teal}{8} \\ \text{£} \textcolor{brown}{1} \textcolor{brown}{2} \cdot \textcolor{brown}{2} \textcolor{teal}{6} \\ \hline \text{£} \textcolor{teal}{5} \textcolor{brown}{5} \cdot \textcolor{brown}{6} \textcolor{teal}{8} \end{array} $ <p>$81,059 + 3,668 + 15,301 + 20,551 = 120,579$</p>  <p>Add unlike fractions, including mixed numbers e.g. $\frac{1}{4} + \frac{2}{3} = \frac{11}{12}$ e.g. $2 \frac{1}{4} + 1 \frac{1}{3} = 3 \frac{7}{12}$</p>	
--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

Year 6: Mental subtraction	Taking away	Using number facts
	<p>Use place value to subtract decimals e.g. $7.782 - 0.08$ e.g. $16.263 - 0.2$</p> <p>Take away multiples of powers of 10 e.g. $132\ 956 - 400$ e.g. $686\ 109 - 40\ 000$ e.g. $7.823 - 0.5$</p>	<p>Derived facts from number bonds to 10 and 100 e.g. $0.1 - 0.075$ using $75 + 25 = 100$ e.g. $5 - 0.65$ using $65 + 35 = 100$</p> <p>Number bonds to £1, £10, £100 and £1000 e.g. $\text{£}7.00 - \text{£}4.37$ e.g. $\text{£}100 - \text{£}66.20$ using $20p + 80p = \text{£}1$ and $\text{£}67 + \text{£}33 = \text{£}100$</p>

	<p>Partitioning or counting back e.g.</p> $3964 - 1051$ <p>e.g. $5.72 - 2.01$</p> <p>Subtract near multiples of powers of 10 e.g.</p> $360\ 078 - 99\ 998$ <p>e.g. $12.831 - 0.99$</p> <p>Counting up</p> <p>Find a difference between two decimal numbers by counting up from the smaller to the larger</p> <p>e.g. $1.2 - 0.87$</p> 	
--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

	<p>Year 6: Written subtraction</p>	
	<p><u>Children use their previous learning of subtraction to solve more complex problems. Children can use the resources to either physically and pictorially explain their mathematical thinking.</u></p>	<p>Subtract unlike fractions, including mixed numbers</p> <p>e.g. $3/4 - 1/3 = 5/12$ e.g. $2\ 3/4 - 1\ 1/3 = 1$</p>

Compact column subtraction for large numbers e.g. 34 685
 $- 16\ 458$

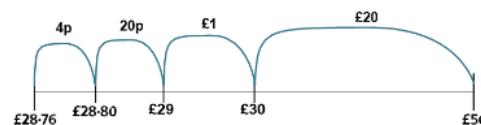

$$\begin{array}{r}
 2 \ 14 \quad 7 \ 15 \\
 3 \ 4 \ 6 \ 8 \ 5 \\
 - 1 \ 6 \ 4 \ 5 \ 8 \\
 \hline
 1 \ 8 \ 2 \ 2 \ 7
 \end{array}$$

Use counting up for subtractions where the larger number is a multiple or near multiple of 1000 or 10 000

Use counting up subtraction when dealing with money e.g.

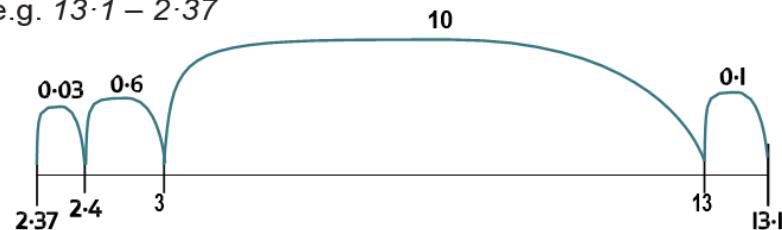

£100 – £78.56

e.g. £45.23 – £27.57

Use counting up subtraction to subtract decimal numbers

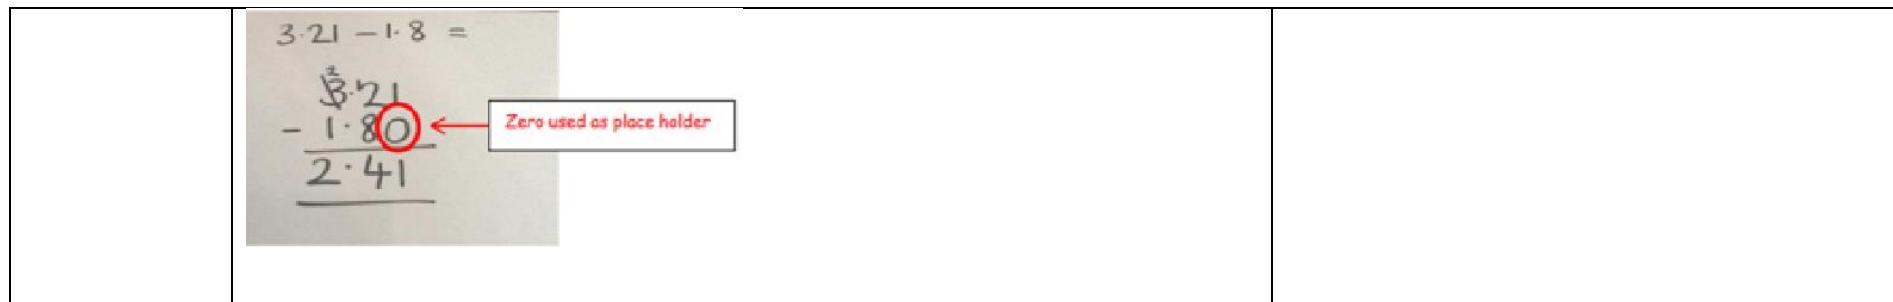

e.g. 13.1 – 2.37

5/12

$$\begin{aligned}
 \frac{4}{6} - \frac{1}{3} &= \frac{2}{6} \\
 \frac{1}{3} &= \frac{2}{6} \\
 \frac{4}{6} - \frac{2}{6} &= \frac{2}{6}
 \end{aligned}$$

NB Counting up subtraction provides a default method for ALL children

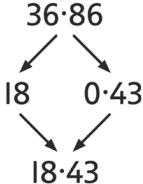

Year 6: Mental multiplication		
Perform mental calculations, including with mixed operations and large numbers Identify common factors, common multiples and prime numbers Use their knowledge of the order of	<p>Doubling and halving Double decimal numbers with up to 2 places using partitioning e.g. double 36.73</p> <p></p> <p>Use doubling and halving as strategies in mental multiplication</p> <p>Grouping Use partitioning as a strategy in mental multiplication, as</p>	<p>Using number facts Use times-tables facts up to 12×12 in mental multiplication of large numbers or numbers with up to 2 decimal places</p> <p>e.g. $6 \times 4 = 24$ and $0.06 \times 4 = 0.24$</p>

<p>operations to carry out calculations involving the 4 operations</p> <p>Use estimation to check answers to calculations and determine, in the context of the problem, an appropriate degree of accuracy</p>	<p>appropriate</p> <p>e.g. 3060×4 as 3000×4 (12 000) and 60×4 (240) = 12 240</p> <p>e.g. 8.4×8 as 8×8 (64) and 0.4×8 (3.2) = 67.2</p> <p>Use factors in mental multiplication</p> <p>e.g. 421×6 as 421×3 (1263) doubled = 2526</p> <p>e.g. 3.42×5 as half of 3.42×10 = 17.1</p> <p>Multiply decimal numbers using near multiples by rounding e.g. 4.3×19 as $(4.3 \times 20) - 4.3 = 81.7$</p>	
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

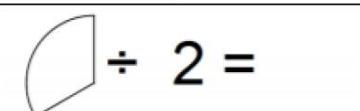

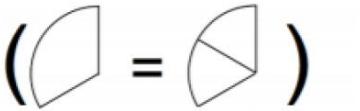

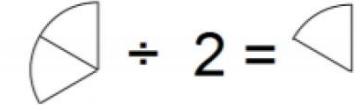

Year 6: Written multiplication											
<p>Multiply multi-digit numbers up to 4 digits by a two-digit whole</p>	<p>Short multiplication of 2-, 3- and 4-digit numbers by 1-digit numbers</p> <p>e.g. 3743×6</p>	<p>Grid multiplication of numbers with up to 2 decimal places by 1-digit numbers</p> <p>e.g. 6.76×4</p> <table border="1" data-bbox="1379 1308 1783 1430"> <tr> <td>x</td><td>6</td><td>0.7</td><td>0.06</td></tr> <tr> <td>4</td><td>24</td><td>2.8</td><td>0.24</td></tr> </table>	x	6	0.7	0.06	4	24	2.8	0.24	$= 27.04$
x	6	0.7	0.06								
4	24	2.8	0.24								

number using the formal written method of long multiplication	$ \begin{array}{r} 3743 \\ \times 6 \\ \hline 421 \\ \hline 22458 \end{array} $ <p>Long multiplication of 2-, 3- and 4-digit numbers by 2-digit numbers e.g. 456×38</p> $ \begin{array}{r} 456 \\ \times 38 \\ \hline 13'6'80 \\ 36'4'8 \\ \hline 17328 \end{array} $ <p>Short multiplication of decimal numbers using $\times 100$ and $\div 100$ e.g. 13.72×6 as $(1372 \times 6) \div 100 = 82.32$</p> <p>Short multiplication of money e.g. £13.72 $\times 6$</p> $ \begin{array}{r} \pounds 1 3.7 2 \\ \times 6 \\ \hline 2 4 1 \\ \hline \pounds 8 2.3 2 \end{array} $	<p>Multiply simple pairs of proper fractions e.g. $1/2 \times 1/4 = 1/8$</p> <p>NB Grid multiplication provides a default method for ALL children</p> <p>Extend to decimals with up to two decimal places.</p> <p>12.5 x2.5 1.25 (2.5 \times 0.5) 5.0 (2.5 \times 2.0) 25.0 (2.5 \times 10.0) 31.25</p>
Year 6: Mental division		
Perform mental calculations	Doubling and halving Halve decimal numbers with up to 2 places using partitioning e.g. half of 36.86 is half of 36 (18) plus half of 0.86 (0.43)	Using number facts

<p>, including with mixed operations and large numbers</p> <p>Identify common factors, common multiples and prime numbers</p> <p>Use their knowledge of the order of operations to carry out calculations involving the 4 operations</p> <p>Use estimation to check answers to calculations and determine,</p>	 <p>Use doubling and halving as strategies in mental division</p> <p>Grouping (chunking)</p> <p>Use the 10th, 20th, 30th, ... or 100th, 200th, 300th ... multiples of the divisor to divide large numbers</p> <p>e.g. $378 \div 9$ as 40×9 (360) and 2×9 (18), remainder 2</p> <p>$186 \div 6 = \square$</p> <p>$\begin{array}{r} \square \times 6 = 186 \\ 30 \times 6 = 180 \\ \hline 6 \\ 1 \times 6 = 6 \\ \hline 0 \\ 31 \end{array}$</p> <p>Use tests for divisibility</p> <p>e.g. 135 divides by 3, as $1 + 3 + 5 = 9$ and 9 is in the $\times 3$ table</p>	<p>Use division facts from the times-tables up to 12×12 to divide decimal numbers by 1-digit numbers</p> <p>e.g. $1.17 \div 3$ is $1/100$ of $117 \div 3$ (39)</p> <p>Know tests of divisibility for numbers divisible by 2, 3, 4, 5, 9, 10 and 25</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

in the context of the problem, an appropriate degree of accuracy		
------------------------------------------------------------------	--	--

Year 6: Written division		
Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions or by rounding as	<p>Children use their previous learning to solve more complex division problems. Children can use resources to either physically or pictorially explain their mathematical thinking.</p> <p>Short division of 3- and 4-digit numbers by 1-digit numbers e.g. $139 \div 3$</p> $3 \overline{)139} \quad \begin{array}{r} 46 \text{ r}1 \\ \hline 139 \end{array}$ <p>Long division of 3- and 4-digit numbers by 2-digit numbers e.g. $4176 \div 13$</p>	<p>Begin to apply division methods to decimal numbers. Either through long or short division</p> <p>$5 \overline{)68.5}$ $5 \overline{)68.5}$ $5 \overline{)68.5}$</p> <p>$\begin{array}{r} 1. \\ -5 \\ \hline 1 \end{array}$ $\begin{array}{r} 13. \\ -5 \\ \hline 18 \\ -15 \\ \hline 3 \end{array}$ $\begin{array}{r} 13.7 \\ -5 \\ \hline 18 \\ -15 \\ \hline 35 \\ -35 \\ \hline \end{array}$</p> <p></p> <p>So, $6.85 \div .5 = 13.7$</p>

<p>appropriate for the context</p> <p>Divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, and interpret according to the context</p>	$300 + 20 + 1, \text{ r } 3$ $13 \overline{)4176}$ $\begin{array}{r} -3900 \\ \hline 276 \\ -260 \\ \hline 16 \\ -13 \\ \hline 3 \end{array}$ <p>4176 ÷ 13 = 321 r 3</p> <p>Give remainders as whole numbers, fractions or decimals</p> <p>Use place value to divide 1- and 2-place decimals by numbers ≤ 12 e.g. $3.65 \div 5$ as $(365 \div 5) \div 100 = 0.73$</p> <p>Divide proper fractions by whole numbers</p>	<p>Dividing decimals:</p> $\frac{1}{3} \div 2 = \frac{1}{6}$ <p></p> <p></p> <p></p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------
